Important 911 Information
Ooma wants to make sure that you are aware of important differences in the way 9-1-1 service operates with Ooma when compared with traditional telephone service. Here’s what you need to know in mind:

Differences between traditional 9-1-1 service and Ooma 9-1-1.

With traditional phone services, your 9-1-1 call is sent directly to the nearest emergency response center. With Ooma phone service, your 9-1-1 call is forwarded to a third-party service provider that will automatically or manually route your call to the brand emergency response center.

Remember to verify your location.
Because you can move your Ooma device between locations and because, for technical reasons, the emergency operator may not have your name, location or contact information available, you must immediately inform the emergency operator of your location and contact particulars any time you call 9-1-1. Do not risk sending police or ambulance services to the wrong location.

Be prepared during any service interruption.
Ooma phone service depends not only on your continued subscription (and payment) for the service, but also on Internet connectivity and power to function. In the event of power, network, or Internet outages (including congestion), or if your service is disconnected or suspended due to non-payment, you may experience a failure, disruption or delay in your 9-1-1 service. We recommend that you keep an alternative phone service (such as a cellular telephone) handy to increase the reliability of your access to emergency services during any service interruption.

Do not disconnect.
Until you are told to do so by an emergency dispatcher, do not disconnect your 9-1-1 call. If you are inadvertently disconnected, call back immediately.
Safety Information

When using telephone equipment, including the Ooma Telo device, basic safety precautions should always be followed to reduce the risk of fire, electric shock, damage to equipment, loss of property, severe injury to persons or even loss of life, including the following:

- Do not use the equipment and all related accessories near or under water, for example, near a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement, near a swimming pool, under the rain, do not plunge any parts in water or any other liquid.
- Avoid using the equipment during an electrical storm. There may be a remote risk of electric shock from lightning.
- Do not use the power adapter, or if necessary order a new replacement power adapter from Ooma or authorized retailers using the original part number.
- Do not insert the power adapter into extension cord, receptacle or outlet unless the prongs can be fully inserted, failure to do so may cause electric shock or excessive heat resulting in a fire or serious electrical shock.
- Do not overload power outlets and extensions cords, otherwise it can result in fire or serious electrical shock.
- To prevent overheating, situate the equipment away from heat sources such as radiators, heat registers, stoves, or other fixtures, appliances and products that produce heat.
- Unplug with caution the equipment from power outlets if it emits smoke, an abnormal smell or makes unusual noise. These conditions may cause fire or electrical shock.
- Do not remove the cover or disassemble any component of the equipment. The equipment contains no user-serviceable parts.
- Unplug the equipment from the power outlet before cleaning. Do not use liquid or if aerosol cleaners, use a damp cloth or a feather duster to avoid moisture exposure.
- The equipment should never be placed near or over radiator or heat register, nor in any area where proper ventilation is not assured.
- Do not allow anything to rest on the equipment, its power cord or power adapter.
- Do not install the equipment where its power cord may be walked on or stumbled on.

Keep your service address up to date. Ooma will attempt to provide the emergency operator with your service address, so please ensure that your information on file with us is always accurate and updated. If you do not do this (for example, if you are unable to speak during a 9-1-1 call), the emergency operator may assume that you are calling from the last registered address.

Inform other users

You must notify members of your household and other potential users of your Ooma phone service of the nature and limitations of 9-1-1 emergency calls.

Limitations of Liability

Ooma’s terms of service limit and disclaim liability related to Ooma 9-1-1 service, so please read these carefully.
