Introduction
The Ooma Safety Phone is a small speaker phone that can be worn or kept by your side all day. Since the Safety Phone is a fully-working speaker phone capable of two-way communication, you can use it to make and receive calls anywhere within the range of your Ooma system.

Package Contents
Charging cradle with AC adapter
Microphone
Status LED
Changes color and blinks to indicate the status of the Safety Phone.
Talk
Press to place a call, and again to end the call. Press and hold to power the Safety Phone on or off.
Speaker
Volume Up
Press to increase earpiece or ringer volume.
Volume Down
Press to decrease earpiece or ringer volume.
Speed Dial Buttons

Quick Start Guide
1. Place the Safety Phone on the charging cradle and charge for a few minutes until the status LED turns purple and you start to hear the Safety Phone play two short beeps periodically.
2. When you are ready to register the phone, take it out of the cradle and put it back in. The status LED will start to blink red and blue.
3. Press and hold the PAGE button on your Ooma device for three seconds to activate registration mode.
4. The Safety Phone will now register with your Ooma system. When the registration process is successful, you will hear a long beep.
5. Continue to charge the Safety Phone for at least three hours until the status LED lights up solid blue.
6. Finish the installation process by going to: http://my.ooma.com/devices. Here you will be able to program the two speed dial buttons.

Operation Instructions
• Powering the Safety Phone on or off
To power the phone on or off, press and hold the TALK button until you hear three short beeps.

• Making an outgoing call
Outgoing calls can be placed to either of the two pre-programmed speed dial buttons. Press the appropriate button to call the programmed number.

• Answering a call
Answer incoming calls by pressing the TALK button.

• Ending a call
To end a call, press the TALK button again while on a call. You can also end a call by putting the Safety Phone back onto the charging cradle.

• Adjusting the volume
The speaker volume can be adjusted up by pressing the VOLUME UP or VOLUME DOWN button during a call. Use the same buttons to adjust the ringer volume when the phone is in idle mode.

• Registering to a new base unit
Register the Safety Phone to a different base unit by pressing and holding the VOLUME UP and VOLUME DOWN buttons at the same time until the status LED flashes red and blue.

Operation Instructions
1. Connect the AC adapter to the charging cradle and plug it into an electrical outlet.
2. Place the Safety Phone on the charging cradle and charge for a few minutes until the status LED turns purple and you start to hear the Safety Phone play two short beeps periodically.
3. When you are ready to register the phone, take it out of the cradle and put it back in. The status LED will start to blink red and blue.
4. Press and hold the PAGE button on your Ooma device for three seconds to activate registration mode.
5. The Safety Phone will now register with your Ooma system. When the registration process is successful, you will hear a long beep.
6. Continue to charge the Safety Phone for at least three hours until the status LED lights up solid blue.
7. Finish the installation process by going to: http://my.ooma.com/devices. Here you will be able to program the two speed dial buttons.

Important Information About the Safety Phone
• Carefully read and follow the instructions in this Quick Start Guide, which may also be viewed online at: http://www.ooma.com/support/documentation
Do not use the Safety Phone if you cannot understand and follow the instructions.

• Use of the Safety Phone requires high-speed Internet access and the Ooma Telo device. The Safety Phone will not work if either the Internet or Ooma Telo are not functioning properly.

• The Safety Phone is intended for indoor use with a range of up to 50 meters (164 feet) from the Ooma Telo. This range may vary based on factors such as home construction and other electrical devices and appliances being used in the home.

• The battery in the Safety Phone is not replaceable. The expected lifetime of the battery is two years, but may vary based on usage.

• Do not use the Safety Phone if you have an implanted cardiac pacemaker.

WARNING: To avoid injury, please review the Important Safety Information section on page 11 before using the Safety Phone.
